

DGNB Switzerland, Consultancy and Certification

EBP is represented by 3 auditors who are among the first to be accredited with DGNB Switzerland.

The DGNB label of the Swiss Sustainable Building Council (SGNI) offers certification with comprehensive sustainability criteria for the Residential, Administration, Commercial and Hotel use classes. With our many years of involvement in the adaptation of the system to Switzerland, and thanks to our three accredited auditors, we are able to offer our clients a comprehensive level of expertise in relation to the DGNB label. The spectrum of our services ranges from expert advice on the entire construction process with a view to certification, through to execution and submission of a certification application to the SGNI. Our experience stems from a very wide range of projects, including SBB Real Estate's Vuelo Tiefenbrunnen and Europaallee construction plot H projects, and Art Campus Berlin.
