Locations around the world

Based in six countries around the world, we are there for our clients with more than 500 employees wherever they need us. More than 300 of our employees work in Switzerland and Germany and more than 200 in Brazil, Chile, the United States and China.

Global competence from a single provider

In order to best combine local technical expertise and market knowledge with internationally leading technologies, competence and experience, we promote the development, skills and competence of our locations around the world. This enables us to offer comprehensive support to our globally active clients wherever they do business. At the same time, we join forces with our clients to make a meaningful contribution to sustainable development.
