

Evaluation of the «Cité des Sciences» area development, Esch sur Alzette

Abandoned steelworks at Belval near Esch sur Alzette in Luxembourg are being transformed into a multi-faceted urban district. EBP is reviewing the environmental, social and economic sustainability of the development process so far on the «Terrasse des Hauts Fourneaux».

Abandoned steelworks at Belval near Esch sur Alzette in Luxembourg are being transformed into a multi-faceted urban district. The University of Luxembourg «Cité des Sciences» campus on the Terrasse des Hauts Fourneaux», a section of the total Belval area, represents a focus on research, innovation and educational uses.

EBP is reviewing the environmental, social and economic sustainability of the development process so far on the «Terrasse des Hauts Fourneaux». The evaluation is conducted through an interdisciplinary progress with the participation of international experts. The review will reveal any needs for optimisation in the further development of the district.
