

Lessee evaluation for Volta site in Basel

In the context of developing the two largest building lots at the Volta site in Basel's St. Johann district, Swiss Federal Railways (SBB) commissioned EBP to help it find a suitable leaseholder for a non-profit residential housing project on lot 2.2 that is to make a significant contribution to the district. The scope of our assignment included drafting the call to tender, developing an assessment scale, overseeing the work of the assessment committee, and executing the selection process.

Our services

- Development of the selection process and drafting of the tender specifications, criteria catalogue, and application form
- Call to tender: publication support and response to applicant questions
- Preliminary inspection and evaluation: processing of application documents; drafting of an assessment scale; oversight of the assessment committee
- Selection and awarding of contract: organization of applicant presentations and selection exam; documentation of the contract-awarding process, communication with the applicants
