

Improving water-resource management in Central Asia

In the framework of a cooperative agreement between Switzerland and the countries of Central Asia, we assisted the Swiss Agency for Development and Cooperation (SDC) in its efforts to promote the efficient and sustainable management of water resources in Central Asia.

In a series of workshops for SDC specialists and the Swiss Cooperation Office in the region, we developed an actionable concept for integrated water management in Central Asia.

Our services

- Provision of technical and management expertise to facilitate an effective dialogue between Switzerland and the countries of Central Asia in matters relating to water, infrastructure, and climate change
- Acting as a liaison between the relevant Swiss Cooperation Office in Central Asia, SDC offices in Bern, and the SDC implementation partners
- Consulting services for the planning of new SDC projects in Central Asia

Client

Swiss Agency for Development and
Cooperation SDC

Facts

Period	2020 - 2021
