

Maintenance planning for ETH office buildings

ETH Zurich's building operations unit has assumed responsibility for maintaining two office buildings owned by the ETH Zurich Foundation. To facilitate the transfer of the maintenance work, we drafted an inventory for the two buildings in accordance with the e-BKP-H standard, identified the main maintenance tasks, and drafted a guideline for the maintenance work.

Our services

- Drafting of inventories according to the categories architecture, fire safety, earthquake resistance, and building systems engineering
- Inventory documentation
- Assignment of inventory items to status categories
- Definition of measures based on the status categories
- Estimation of necessary investments
- Assignment of the investments to work packages
- Drafting of a maintenance plan as a guide for maintenance tasks and long-term financial planning
