

Impact analysis: Projects within the Biodiversity Action Plan

The Federal Council responded to the urgent need for action in view of the decline in biodiversity in Switzerland with Swiss Biodiversity Strategy. On behalf of the FOEN, in cooperation with econcept, l'Azuré and Swild, we evaluated a total of seven projects within the Swiss biodiversity strategy action plan. The Federal Council shall decide on the continuation and financing of the implementation of the action plan based on this evaluation.

Our services

- Evaluation of the two projects: "Avoiding the death of birds on electricity pylons" and "Safe medium-voltage railway pylons for birds" (lead: EBP)
- Analysis of the implementation, results and impacts of the projects as well as project management and monitoring
- Conducting of semi-structured interviews, focus group discussions as well as synthesis and validation workshops.
